

Law and Borders in Cybersecurity and Data Privacy

2nd SIGNAL Symposium

Venue: Kjerka, Domus Media
University of Oslo

21 June 2018

This symposium explores some of the myriad borders – legal, geopolitical, technical and conceptual – that inhere in, frame or catalyze regulatory challenges in the areas of cybersecurity and data privacy. The symposium is the second of four annual conferences that are being held under the aegis of the research project ‘Security in Internet Governance and Networks: Analyzing the Law’ (SIGNAL).

The SIGNAL project is run by the Norwegian Research Center for Computers and Law (NRCCL) in collaboration with several partner institutions. It is funded by the Norwegian Research Council and UNINETT Norid AS.
