ANNEX III

CRITICAL PRODUCTS WITH DIGITAL ELEMENTS

Class I

1. Identity management systems software and privileged access management software;
 2. Standalone and embedded browsers;
 3. Password managers;
 4. Software that searches for, removes, or quarantines malicious software;
 5. Products with digital elements with the function of virtual private network (VPN);
 6. Network management systems;
 7. Network configuration management tools;
 8. Network traffic monitoring systems;
 9. Management of network resources;
 10. Security information and event management (SIEM) systems;
 11. Update/patch management, including boot managers;
 12. Application configuration management systems;
 13. Remote access/sharing software;
 14. Mobile device management software;
 15. Physical network interfaces;
-

Cyber Resilience Act

introduces mandatory cybersecurity requirements
for hardware and software products, throughout their whole lifecycle

Products

- Ensure that products with digital elements placed on the EU market
 - have fewer vulnerabilities and that manufacturers remain responsible for cybersecurity throughout a product's life cycle;
- ‘product with digital elements’
 - means any software or hardware product and its remote data processing solutions,
 - including software or hardware components to be placed on the market separately;

CRA fact sheet (EC)

Manufacturer's obligations

Cybersecurity is taken into account in **planning, design, development, production, delivery** and **maintenance** phase;

All **cybersecurity risks** are documented;

Manufacturers will have to **report actively exploited vulnerabilities and incidents**;

Once sold, manufacturers must ensure that for the **expected product lifetime** or for a period of five years (whichever is the shorter), **vulnerabilities are handled effectively**;

Clear and understandable instructions for the use of products with digital elements;

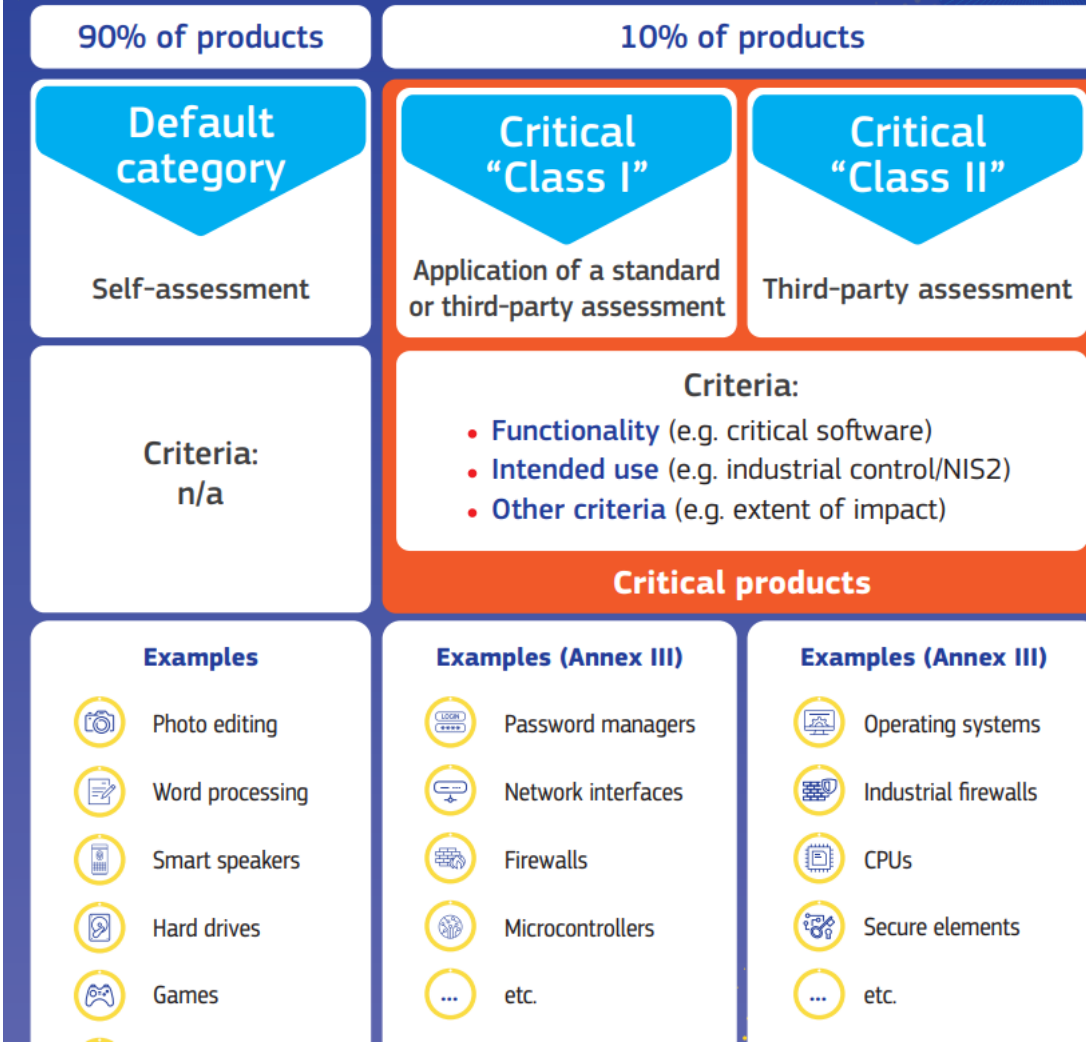

Security updates to be made **available for at least five years**.
