

Seminar on Content Delivery Networks and Net Neutrality

16th April 2012 (12:00 – 16:00)

Norwegian Research Center for Computers and Law,
Faculty of Law, University of Oslo
Venue: Room 540, Domus Nova, St. Olavs plass. 5

The use of Content Delivery Networks enhances an Internet content providers' service to its customers by placing their content closer to the user. This could have an effect on the principle of Net Neutrality as access to these CDNs is normally at a cost which can be prohibitive to smaller content providers.

Agenda

12:00 Lunch

12:30 Darren Read (NRCCL):
Research questions regarding Net Neutrality (NN)

13:00 Discussion

13:15 Håkon Styri (Norwegian Post and Telecommunications Authority):
